

Infrastructure as Code: AWS CloudFormation and AWS Cloud Development Kit Workshop

In this lab, you will learn how to create system resources in the cloud using AWS CloudFormation and the AWS Cloud Development Kit (CDK). These two approaches to working with resources is known as **Infrastructure as Code** (IaC). The first part of the lab will focus on CloudFormation and how it is used to create AWS resources like S3 buckets. The second part of the workshop will focus on CDK, and how you can use a programming language like Python to interact with AWS.

Expected completion time for this lab is 60 minutes.

This workshop was crafted for you by the Academic Advocacy Team
